Teva Suspicious Order Report Analysis**Prepared By: Uzair Saleem****Version: Jan 16, 2019**

Summary of Findings: Below is an analysis of the suspicious orders reported by Teva to the DEA through 2018. The information is taken from documents and testimony by Joe Tomkiewicz, Teva's current SOM Manager. The analysis shows that Teva reported very few suspicious order even after they put their updated SOM program in place after 2012, and that the reports they did make were for smaller pharmacies that were not their larger established customers and many of which were already in the DEA crosshairs.
